Devmountain | Lehi, UT   *January 2024 - April 2024*
Web Developer / Software Engineer (student)

Alpine Twin Peak Maintenance // LincLLC - Github Repo

React | Redux | NodeJS | Express | PostgreSQL | React Bootstrap
- Website that I have built for my outdoor maintenance business, focused on lawn care, grill cleaning, and powerwashing
- Integrated React Bootstrap for styling while implementing the use of React components for an organized and fast web application
- Utilized the React-Calendar dependency to create a scheduling tool that is easy for users to create appointments for desired services.

Nature Network- Github Repo

React | Redux | NodeJS | Express | PostgreSQL | React Bootstrap | Google Maps API | NPS API | Github
- Social media platform where users can go to create posts about their National Park trips and experiences
- Integrated the National Park Service API to display information and activities for each of the National Parks within the United States
- Utilized GitHub and Git branching effectively for collaborating and working as a team

Smith's Food and Drug | Sandy, UT   *August 2023 - January 2024*
Pharmacy Technician

- Diligently processed and managed 150+ medication orders daily, ensuring accuracy and adherence to prescription specifications
- Interacted with patients and healthcare professionals, providing excellent customer service and addressing inquiries regarding medications and health-related concerns
- Managed a fast-paced work environment by efficiently filling and dispensing prescriptions within established timelines

VOLUNTEER EXPERIENCE

Religious Service Mission | Córdoba, Argentina   *August 2021 - August 2023*
Missionary

- Devoted all time to helping others in any way, shape, or form possible
- Excelled in spreadsheet management during time spent in mission office, using gained experience to train and mentor fellow missionaries in effective spreadsheet usage
